Łukasiewicz – PIAP Delivers Robots to Indonesia

July 28, 2021 CIEDR

Łukasiewicz Research Network – Industrial Research Institute for Automation and Measurements PIAP has delivered another batch of EOD robots for the Indonesian military. Notably, Łukasiewicz-PIAP products have been present there since 2014.

The contractual work completed this time referred to the PIAP Gryf EOD robots. They have been received by the EOD Teams of the Indonesian Army, as well as the Air Force. On 22nd – 25th June, the prospective users were trained, and functional hand-off of the delivered systems took place. Notably, the Łukasiewicz-PIAP robots are operated by all branches of the Indonesian military.

Along with the PIAP Gryf robots, the Indonesian Armed Forces also received the following accessories:

- Holder for the recoilless disruptor, and FNK,
- Active fiber-optics winder,
- FNK (Freeze Neutralizing Kit)
